There are also a range of free tools in built on devices to help you access this document and other readings. You can find more information on the Ability net [My Computer My Way website](#) and the [Assistive Technology and Ease of Access Intranet page](#).

## Welcome and Introduction

### Welcome

Dear students,

Welcome to our Computing module at the University of East London. Over the coming year you'll build practical skills in problem-solving, and professional practice, while connecting theory to real-world applications. This is your final year, you should be very proud of your achievements to reaching this far.

Teaching combines weekly lectures, regular supervisory meetings, and guided independent study. To get the most from the module, attend regularly, participate in activities, and keep up with weekly readings on Moodle. Assessments will focus on applying concepts to realistic tasks; full details and marking criteria are on the module site.

Please take a moment today to: (1) read the Module Guide, (2) check the schedule and deadlines, and (3) and make sure you do not miss your lectures.

We are committed to an inclusive, supportive learning environment. If you need adjustments or study support, reach out early—confidentially—to me or UEL services.

I'm looking forward to working with you. Questions are always welcome in the lecture but anything else, please put these to your supervisor.

## Introduction to the Course

This guide provides a detailed overview of final year undergraduate computing projects within the School of Architecture, Computing and Engineering (ACE). All final year project students on computing based programmes within ACE should read this study guide and follow the guidelines contained herein.

The final year project is the single most important element of your degree programme, requiring you to solve a significant problem within the area of computing. The project will allow you to apply a range of skills that you have acquired over the course of your degree programme and enable you to demonstrate your competence as a computing professional.

The project is intended as an opportunity for you to demonstrate your problem solving skills and it must therefore include a substantial amount of computing/scientific/engineering content. Your project should involve elements such as software or application development, mathematical modelling, empirical investigation or other scientific or engineering methodologies related to the area of computing.

The content of projects will vary from one student to another although projects will typically include an analysis of a software and/or hardware related problem followed by the design, implementation, testing, validation and evaluation of a solution to the analysed problem.

This study guide will also highlight the key deadlines and milestones that you must meet during your final year project.

***Dr Fadi Safieddine***

### Module Leaders

## Key Staff, Contact Details and Staff Roles

The Key Staff and Contact Details are correct at point of publication. You will be notified of any changes.

### MODULE LEADER

**Name:** *Dr Fadi Safieddine*

**Email:** [fadi@uel.ac.uk](mailto:fadi@uel.ac.uk)

**Tel:** *Via MS Teams*

**Room Number:** *EB.1.104*

Office hours: Tuesdays 9:00- 11:00 Face to face or via MS Teams

List of supervisors will be made available on the Moodle page.

## Course Operation and Student Registration

The teaching of this module will be delivered by a series of lectures. However, the bulk of your learning will take place independently as you undertake the various tasks associated with your project. Throughout this process of independent learning, you will be supported by your project supervisor, an academic member of staff.

Lecture sessions will take place during term 1 (with a few lectures in term 2) and will provide you with the knowledge required to deliver a successful final year project. These sessions will last for a maximum of 2 hours per week.

The first step of the project is for you to choose a supervisor who will support you during the duration of the project (see Section 7). You are encouraged to find a supervisor who offers a project proposal or whose expertise matches your interests. Please note that staff have finite capacity and therefore the module leader cannot guarantee that you will be allocated your choice of supervisor. The allocation of supervisors is a first-come-first-served process and so the sooner you contact a particular member of staff, the more likely you are to be allocated that member of staff.

Extensive use of both Moodle and Microsoft Teams will be made during this module. The Moodle site will contain a variety of information and resources including teaching and learning materials, details of important events and deadlines. Teams will be used for the purposes of communication. Staff will use Teams to make announcements and to keep you abreast of important developments. You should use Teams to contact staff and to post any questions you have about the operation of this module. For the above reasons, it is essential that you check both Moodle and Teams regularly. The majority of your time on this module will be spent in private study. You are expected to use this private study time to review the lecture material, carry out the suggested reading for that week, and prepare for practicals as instructed.

Your personal information is stored on your own **UEL Direct** account, and it includes your name, date of birth, term-time contact address, home address and email/phone contact details. It is essential that you keep this information up to date. You can change your personal information at any time at [UEL Direct](#). If you need to change your name or date of birth you will need to show original documents showing the correct name: Please visit either of the Student Support Hubs with the correct documents for amendments.

At present, you can use UEL Direct to:

- Check which modules you are registered on;
- Update student address details;
- View assessment results;
- Module results and progression decisions.

## Course Management

You can access all your Moodle and Teams sites via UEL's **TrackMyFuture** portal:  
<https://trackmyfuture.uel.ac.uk>

You can also directly access your **CN7039 Moodle site** by going to the following link:

<https://moodle.uel.ac.uk/user/index.php?id=83110>

The **Moodle** site will contain a variety of information and resources including teaching and learning materials (links to reading, lecture slides, lab exercises, etc), a calendar of important events and coursework deadlines and important news regarding the operation of this module.

You should check Moodle regularly!

As mentioned above, your lab/lecture sessions will be a rotation of **on-line** sessions and **face-to-face** on campus sessions. **Microsoft Teams** will be used to allow you to interact with these sessions on-line.

It is strongly advised that, if you come to campus for your lab sessions, that you still **bring a set of headphones with you** in order to communicate with and allow your tutor to take control of your machine in Microsoft Teams if need be.

## Key Dates

The term will start on Monday 29<sup>th</sup> September and finish Friday the 19<sup>th</sup> of December. But for this block mode module, it will start on Tuesday 28<sup>th</sup> of September and finish on Friday 10<sup>th</sup> of October.

You can see your timetable here: <https://ueltt.uel.ac.uk/>

Deadlines for this term:

- **15<sup>th</sup> of October 2025:** Submit Topic and Supervisor on Moodle
- **29<sup>th</sup> of October 2025:** Submit the complete proposal
- **26<sup>th</sup> of November 2025:** Ethical Approval
- **10<sup>th</sup> of December 2025:** Career Pathway Submission (10%)
- **Week of 26<sup>th</sup> of January 2026:** Presentation of progress (10%)
- **Week of 22<sup>nd</sup> of April 2026:** Showcase event
- **8<sup>th</sup> of May 2026:** Submit the Dissertation (65%)
- **Week of 11<sup>th</sup> May 2026:** Viva (15%)

Submitting the report could be done remotely.

# Conduct

UEL has adopted a range of policies and procedures to help promote good behaviour and to identify the **standards of behaviour** that are required. These include regulations and procedures, and descriptors of the responsibilities of students. The Code of Conduct covers student behaviour and responsibilities.

More information:

The [Student Policies](#)  
[Student Conduct Team](#)

## Academic Misconduct and Plagiarism

For the purposes of university's regulations, **academic misconduct** is defined as any type of **cheating** in an assessment for the purposes of achieving personal gain. Please follow the links below to learn more.

More Information

- [Student Handbook page on Academic Misconduct and Plagiarism](#)
- [Academic Integrity and Academic Misconduct Policy](#)

## Research Integrity

The University adheres to its responsibility to support and promote the highest standards of **rigour and integrity** and embed a culture of honesty, transparency and care and respect for all participants and subjects of research. The University is committed to ensuring that research is conducted with integrity and good research practices are upheld. Please follow the link below to learn more.

More information:

- [Research Integrity and Ethics Document page](#)

## Non-academic Misconduct

Any behavioural misconduct, whether verbal, physical or threats may be investigated by the Student Conduct Team under the [Non-Academic Misconduct Policy](#) or the Sexual Violence and Misconduct Policy. The [Report and Support](#) platform can be used by all members of the community to report incidents or to seek internal and external support.

## Harassment and Sexual Misconduct

As part of the University's commitment to fostering a safe and respectful living environment, all students are required to review and understand the University's policies on harassment and sexual misconduct. This includes engaging with mandatory training designed to help students recognise, prevent, and respond to inappropriate behaviours. By 1st August 2025, the University will have a single, comprehensive source of information outlining these policies, including guidance on reporting incidents, accessing support services, and understanding investigation and resolution processes. Further details will be located on the University's website Dignity and Respect | University of East London..

## Freedom of Speech

Throughout your course, there will be opportunities to debate on different topics, some of which some may be controversial and challenging. Being able to debate these topics is an important part of your development both at your time here and in your future. To support this, we have developed further information and guidance in our UEL Freedom of Speech Statement, alongside a Code of Practice and Frequently Asked Questions.

UEL have adopted the Universities UK definitions of freedom of speech and academic freedom, and for guidance these are set out below:

**Freedom of speech** means everyone has the right to express lawful views and opinions freely, in speech or in writing, without interference.

**Academic freedom** means protecting the intellectual independence of academics to question and test received views and wisdom, and to put forward new ideas and controversial or unpopular opinions, without placing themselves in danger of losing their jobs or privileges or reducing the likelihood of them securing promotion or different roles at the university.

More information:

- [The University's Student Policies](#)
- [Report + Support for reporting incidents](#)
- [Freedom of Speech | University of East London \(uel.ac.uk\)](#)

## Track my Future

Track My Future (TMF) is a personalised online companion, enabling you to get the most of your time at the University of East London. It brings together essential learning tools such as Moodle, your timetable, Career Zone, emails, academic advisor information, assessment results, your student record, social opportunities, campus maps and more... all within a single app.

The Track My Future app will help you:

- Find personally relevant information in one place.
- Know where to be and when.
- Manage your academic schedule with a timetable, upcoming Moodle tasks, and appointments all in one place.
- Do more with more self-service.
- Receive communications and alerts tailored to your preferences.
- Feedback on how you are feeling, through quick surveys and polls.
- Complete online payments and check outstanding balances.

For more information, including how to access our long-standing SharePoint platform and newly developed mobile app, please visit:

[Track my future](#)

## Teaching, Learning and Assessment

You must achieve an overall module mark of 40% in order to pass this module. The module is entirely assessed by the **coursework tasks**, which is therefore worth a total of **100%** of the overall assessment for this module. The coursework will consist of 6 tasks (total 100 marks) set during the practical labs each week that test your formal modelling, testing and programming skills.

At the end of this module, students will be able to:

### **Knowledge**

1. Demonstrate a sound knowledge and understanding of the subject area to which their project relates (IC) (CI)

### **Thinking skills**

2. Critically reflect upon the ethical, legal, and social considerations of a chosen project topic (IC) (CI) (SEI) (COI)
3. Evaluate both the research of others and their own project work (CI) (COI)

### **Subject-based practical skills**

4. Analyse the problem domain to which the project relates and present that analysis in the form of a literature review (IC) (CI)
5. Specify, design and implement a solution to a non-trivial computing problem using industry-standard methodologies, tools and techniques (DP) (IC) (CC) (EE)

### **Skills for life and work (general skills)**

6. Defend their work using both verbal and non-verbal communication channels (DP) (SEI)
7. Demonstrate an ability to organise, manage, and document a sizeable piece of independent academic work (DP) (SEI) (PI)
8. Provide feedback to mentees and peers (SEI) (CC)

9. Produce meaningful and realistic career goals and pathways for achieving this (IC, CC, EE)

We strongly suggest that you try to submit all coursework by the deadline set as meeting deadlines is expected in employment. However, in our regulations, UEL has permitted students to be able to submit their coursework up to 24 hours after the deadline. Coursework, which is submitted late, but within 24 hours of the deadline, will be assessed but subject to a fixed penalty.

Please note that if you submit twice, once before the deadline and once during the 24-hour late period, then the second submission will be marked and the fixed penalty applied. This rule only applies to coursework. It does not apply to examinations, presentations, performances, practical assessments or viva voce examinations. If you miss these for a genuine reason, then you will need to apply for extenuating circumstances, or accept that you will receive a zero mark.

As well as this, **summative assessment** (i.e. assessment that counts towards your final module mark), there will also be regular in-class quizzes to provide you with feedback in the form of **formative assessment** (i.e. assessment that does not count towards your final module mark).

More information:

[Student Handbook page on Assessment and Feedback](#)

## Library and Resources

We have two great **libraries** at UEL – Docklands and Stratford – and a range of services and resources that can help you make the most of your studies.

- The Library, Archives and Learning Services homepage includes Library Search where you can find books and journal articles on your reading lists, and links to databases where you can find all the latest research across all subject areas. You can also find information about our Archives and Disability and Dyslexia Support services.
- If you need support with your literature searching strategies, you can book an online 1-2-1 with your Academic Services Librarian who will guide you on how to make effective use of the resources we provide.

More information:

- [Link to the Library and Learning Services homepage](#) (UEL login required)

## Referencing

As a student you will be taught how to write correctly referenced essays. UEL's standard **Harvard referencing** system is from *Cite Them Right*. Cite them Right is the standard Harvard referencing style at UEL for all Schools, however professional

body requirements will take precedence for instance the School of Psychology which uses the APA system.

More information:

- [Student Handbook page on Cite Them Right](#) (UEL login required)
- [Academic skills drop in \(academic tutoring\)](#) (UEL login required)

## Academic Tutoring

The Academic Tutors advise students on academic skills, such as writing essays and reports, citing and referencing sources, presentations, working with statistics and many more. They work with lecturers to embed sessions in your course to support assignment success. They also provide workshops open to all students, advertised during the term.

You can get one-to-one advice from an academic tutor by [booking an online appointment or visiting a drop-in session](#) on campus. You can also access online sources and get feedback on your writing at your own pace using the [MyFeedback](#) service. Please visit our [intranet page](#) for more information.

## Problems Completing an Assessment

You may be in a position where you cannot submit your coursework or take an exam due to circumstances that are:

- Unforeseeable - in that you could have no prior knowledge of the event concerned, and
- Unpreventable - in that you could do nothing reasonably in your power to prevent such an event, and
- Expected to have a serious impact on performance.

More information on support available to you can be found via the [mitigation](#) webpages and the [Students Union](#)

## Student Feedback Mechanisms

UEL values **student feedback** and there are lots of channels for gathering feedback on your educational experience. You can get involved and have your say in a number of ways.

More information:

## Placement Arrangements

Placements, internships, and work-based learning provide opportunities for you to gain work experience, develop work-related skills, learn about professional sectors and how your studies can be directly applied in the work environment. Many courses include placements as part of the formal course of study or, as a mandatory professional requirement. If your course does not include a placement, then it's advisable to source work-experience while you study. The Career Zone team can support you with applying for work experience opportunities. Login to the [Career Zone](#) platform to search the Jobs Board and access a wealth of resources to help to you prepare for and apply for opportunities.

- [Career Zone Platform](#)
- [Policy on work-based learning and placement management](#)

## Engagement and Attendance

Evidence shows that good attendance has a positive impact on academic performance. As a university, we are committed to supporting you in reaching your full potential.

[Student Engagement, Retention and Success Unit \(SERT\)](#) is here to support you in reaching your full potential. By monitoring attendance and engagement, we can identify early signs that you may need support and work with you to address any challenges that could be affecting your learning.

If you are experiencing challenges that impact your ability to engage with your course, you can speak to a member of the team in person at either the Docklands or Stratford campus, or remotely by telephone. To book an appointment or ask a question, please use [MyPortal](#) or call The Hub on 0208 223 4444 to speak with our Duty Advisor (available weekdays, 10am-1pm, excluding bank holidays).

## Support for Students

Student Services is responsible for nurturing wellness, supporting individual needs, helping students in crisis and enabling positive experiences through on-campus accommodation and extra-curricular activities. Working in partnership across academic schools and professional services, our teams seek to provide a network of support throughout the student journey and aim to optimise student success.

If you're ever unsure of anything, you can get support from our Student Hub team and track your queries by logging into [My Portal](#). Alternatively, you can call on **0208 223 4444** or visit them on campus.

Full details of all our services are available on our [Student Services Homepage](#).

## Academic Advisors

To help you make the most of your studies, every student undertaking undergraduate or taught masters' courses at UEL is assigned a member of academic staff as their Academic Advisor (AA). Your AA will support you to achieve the degree you want. Please follow the link below to learn more.

- [Student Handbook page on Academic Advisors](#) (UEL login required)

## Students' Union

East London Students' Union offers a range of services for students including a range of student groups/societies, activities and events campaigns, and impartial advice on complaints, academic processes and appeals.

More information

[Students' Union webpage](#)

## Student Hubs

The **Student Hubs** are located at each site and offer you the full range of services, including helpdesk services, a dedicated telephone service and webmail facility. These are delivered by fully trained Student Support staff, able to help you quickly and effectively with any general questions and provide you with support and guidance immediately.

We can advise and support you on your student journey in countless ways, including:

- Student documentation (ie. Student status letters, bank letters & council tax exemption letters)
- Applying for an 18+ Oyster card
- Internet access queries
- Course and module related queries (i.e. Course & module change requests)
- Enrolment and re-enrolment queries
- Obtaining your student ID card
- Assessment related advice (i.e. Extenuation guidance)

- Signposting and appointments with professional support services (e.g. Student Money, Advice and Rights Team, Student Wellbeing team, Disability & Dyslexia team, International Student Advice, Financial Services)

How to contact us:

By Telephone – +44 (0)20 8223 4444

Online Enquiries – [MyPortal](#)

At our Student Hub Helpdesks (Docklands, Stratford and USS campuses): Monday to Friday from 09:00 – 17:00 (excluding bank holidays and public holidays)

More information

[How the Student Hub can support you](#)

## Faith and Spirituality

All UEL students are welcome to access the faith and reflection centre and prayer spaces at both the Docklands and Stratford Campus. They are also able to seek support from the Chaplaincy Manager and honorary chaplains. [Faith & Spirituality | University of East London](#).

More Information

- [Student Handbook page on Student Hubs](#) (UEL login required)

## Complaints and Appeals

If you feel that our University has not delivered the standard of service which it would be reasonable to expect, you may be entitled to lodge a complaint or an appeal. You can find information on how to begin either of these processes in the links below.

[More information:](#)

- [Student Handbook pages on Appeals and Complaints \(UEL login required\)](#)
- [Complaints Procedure](#)
- [Student Policy on Academic Appeals](#)

## Health and Safety

It is the policy of University of East London to ensure, so far as reasonably practicable, the health, safety and wellbeing of all staff, students and others who may be affected by the undertakings of the University.

- [University of East London's Health and Safety management page.](#)

## Campus Maps

The University of East London has three main campuses. There is a free, regular **bus service** for students and staff, between campuses. [The timetable is available on the intranet.](#)

- [Docklands Campus Map](#)
- [Stratford Campus Map](#)
- [University Square Stratford](#)

| <p style="text-align: center;"><b>Summary of module for applicants:</b></p> <p>Developing professional skills are increasingly critical for successful graduate-level employment, entrepreneurship and career progression in the 4<sup>th</sup> industrial revolution.</p> <p>This module will provide students with the opportunity to apply the full range of skills, competencies and experience required for successful development to, and in, a range of potential future career areas.</p> <p>Herein they will advance the areas identified at level 5 for their own personal professional development (including emotional, social, physical, cultural and cognitive intelligences) through taught and workshop activity.</p> <p>Students will undertake a sizeable piece of individual academic work in an area of their own interest relevant to, and demonstrating technical skills acquired in, their programme of study. Students will normally need to research one or more academic topic areas and then apply their findings to the construction of a computer-based system.</p> <p>Students will consider the ethical, legal, social, and professional issues in the construction of systems and the project will require appropriate research, analysis, design, implementation, quality assurance, evaluation and project management.</p> <p style="padding-left: 40px;">Students will reflect on the success of the strategies that they employed to further develop their reflective skills, self-awareness, 'life style' and 'self care' approaches and where necessary improve their approaches.</p> <p>Students will have opportunity to select an in-house microbusiness to join in the role of 'Manager'. In this position they will oversee the successful operation of the enterprise, coach and mentor students new to the programme. Working collaboratively with peers and academic staff, they will ensure the effective delivery of a live project by managing people and physical resources. In doing so they will apply the skills learnt elsewhere in their studies (and from external activities) required in the workplace.</p> |                                                                                                          |                                              |
| <p style="text-align: center;"><b>Main topics of study:</b></p> <p>The module will enable students to apply and develop a variety of skills based competencies explored at level 5, including: self-awareness and regulation; mindfulness; emotional resilience; motivation; ethical decision-making; active listening; self-discipline and management; attention; reaction and response time; cognitive and muscle memory; managing stress; physical resilience; subject knowledge; cognitive flexibility; managing an audience; co-ordinating with others, negotiation; creativity; leadership and entrepreneurship; service orientation; critical thinking; complex problem solving; research synthesis and analysis.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                          |                                              |

Students cover the following topics by applying knowledge and understanding of them to their chosen project:

- Identification of a suitable project topic
- Research methods
- Literature surveys, searches and reviews
- Plagiarism and referencing
- Project planning, monitoring, risk assessment and control
- Academic writing and presentation skills
- The development, to a professional standard, of a large, non-trivial computer-based system or the critical evaluation of a recent development in the field of computing
- The documentation, to a professional standard, of a significant, problem-focused computing task including the study of the application domain, a detailed analysis of the problem and a solution to the problem.

**This module will be able to demonstrate at least one of the following examples/ exposures**

**Live, applied project** ☑

**Company/engagement visits** ☑

**Company/industry sector endorsement/badging/sponsorship/award** ☑

**Learning Outcomes for the module**

- *Digital Proficiency - Code = (DP)*
- *Industry Connections - Code = (IC)*
- *Social & Emotional Intelligence - Code = (SEI)*
- *Physical Intelligence - Code = (PI)*
- *Cultural Intelligence - Code = (CI)*
- *Community Connections & UEL Give Back- Code = (CC)*
- *Cognitive Intelligence- Code = (COI)*
- *Enterprise and Entrepreneurship - Code = (EE)*

At the end of this module, students will be able to:

**Knowledge**

10. Demonstrate a sound knowledge and understanding of the subject area to which their project relates (IC) (CI)

**Thinking skills**

11. Critically reflect upon the ethical, legal, and social considerations of a chosen project topic (IC) (CI) (SEI) (COI)
12. Evaluate both the research of others and their own project work (CI) (COI)

**Subject-based practical skills**

13. Analyse the problem domain to which the project relates and present that analysis in the form of a literature review (IC) (CI)
14. Specify, design and implement a solution to a non-trivial computing problem using industry-standard methodologies, tools and techniques (DP) (IC) (CC) (EE)

**Skills for life and work (general skills)**

15. Defend their work using both verbal and non-verbal communication channels (DP) (SEI)
16. Demonstrate an ability to organise, manage, and document a sizeable piece of independent academic work (DP) (SEI) (PI)
17. Provide feedback to mentees and peers (SEI) (CC)
18. Produce meaningful and realistic career goals and pathways for achieving this (IC, CC, EE)

**Teaching/ learning methods/strategies used to enable the achievement of learning outcomes:**  
**For on campus students:**

Lectures will be used to provide an overview of the project, its requirements and organisation and an introduction to research methods, literature surveys and referencing. In addition, every student will be allocated a supervisor at an early stage within the module. The supervisor will support the student for

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                    |                                                                                |
